February 27, 2026

## Principal's Message

With the sunny weather beginning to make an appearance and spring just around the corner, we know this time of year can feel both energizing and busy for families. If at any point you have questions, concerns, or simply need clarification, please do not hesitate to call the school or connect directly with our administrative team. We are always happy to meet, talk things through, and support you in any way we can. Open communication is important to us, and we value the partnership we share with our families.

This time of year also provides a valuable opportunity to reinforce the importance of self-advocacy. When students ask questions, seek clarification, and access extra help, they build confidence, independence, and resilience. Meaningful growth often happens beyond the classroom walls — through practice, revision, extra study time, and a willingness to lean into challenges. When students dedicate time outside of class to strengthen their skills while maintaining a growth mindset, they position themselves not only for academic success, but for long-term personal growth.

Thank you for your continued partnership and commitment to our school community!

Mrs. Nett

2025-2026

## YEARBOOK

**DO YOU HAVE PICTURES OF OUR SPORTING EVENTS OR OTHER SCHOOL EVENTS? NOW THERE IS AN EASY WAY TO SHARE YOUR PICTURES WITH US!**

**THIS YEAR WILL ONCE AGAIN BE USING LIFETOUCH FOR OUR YEARBOOKS. USE THE URL OR QR CODE TO UPLOAD ANY PICTURES YOU HAVE TAKEN OF OUR STUDENTS AND EVENTS. AFTER CREATING AN ACCOUNT USE THE CODE  
MCLURGBRONCS-26**

SCC Meeting Thursday, March 5<sup>th</sup> at 4:30 PM

## FINS

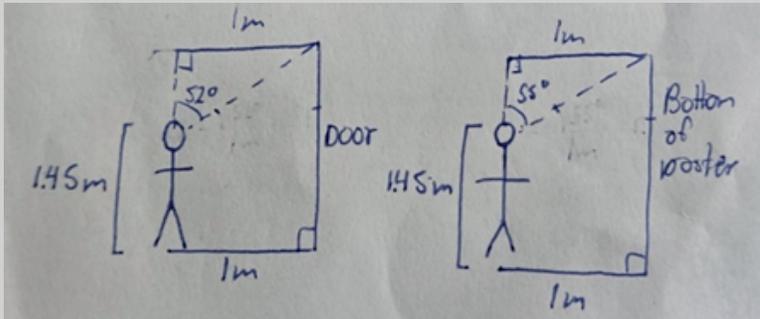

Currently, the trout have been tucked away in the rocks and sand – it is like “Where’s Waldo” to try and spot them. They are currently in the alevin stage, which means that they are consuming their egg sac and will soon begin to look for food. Beginning next week, we will start feeding them and they will receive 0.5 grams of food a day for the first two weeks of March, and then 1 gram a day for the following two weeks. We look forward to seeing them swimming around in the tank looking for food! Thanks again to our sponsors, the Wilkie Wildlife Federation and Unity Wildlife Federation, for their generous donations in making this project a reality.

## Foundations Math and Pre-Calc 10

The F&P 10 class has been revisiting the three primary trigonometric ratios with a deeper look into how they could use tangent to measure objects around them. They built clinometers and then went around the school to measure different tall objects, such as the Mario mural and the lockers. Joelle and Lexie braved the cold to measure the McLurg sign outside. A few groups took this concept deeper and, after calculating the height of the object, went and measured it to see how close they were. Keep up the great work F&P 10!

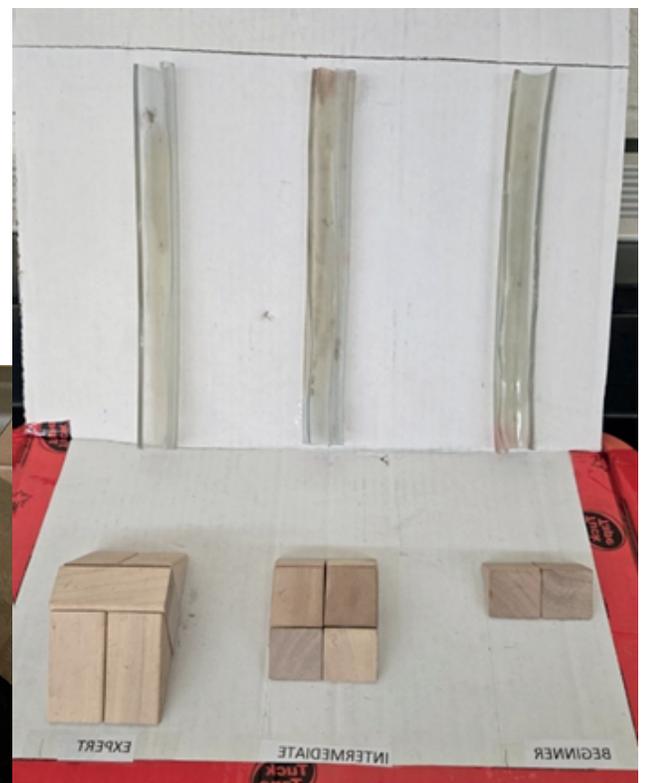

Miss Loewen

## Workplace & Apprenticeship Math 20

The W&A 20 class started the year off by looking at slope and percent grade. They then got to combine their construction and slope skills by building a beginner, intermediate, and expert ski jump for their marble "person" which spurred some good conversations about the Olympics. I look forward to seeing their creativity in future projects.

Miss Loewen

## Elder Jeanette Bugler

On February 24<sup>th</sup>, we were fortunate to have Elder Jeanette Bugler on site working with our students. Thanks to the Elders in Schools grant through Living Sky School Division for making this possible. The students in Grades 8 and 9 made connections with their ELA curriculum hearing various stories about creation and tricksters to start off the day. Students in Grade 7, HEc 20/30 and HEc 9 learned how to make bannock with stories along the way. We look forward to welcoming Elder Jeanette back into the school soon.

# SLC NEWS!

On Friday, February 13<sup>th</sup> the SLC held a baking bingo as well as sold candygrams throughout the week to students. With the gracious donations from our baking bingo and candygram sales, we will be donating \$450 to TeleMiracle50.

## Home Ec 20/30

Home Ec 20/30 is currently working on a unit about cakes and pastries and decorating these confections. For the Cake Bingo on February 13<sup>th</sup>, the students created cupcakes then decorated them to be won in the bingo. These students have great attitudes and are always able to giggle at themselves as we learn and make mistakes. It makes it so much more fun in the kitchen when we can have these kinds of fun days.
